

Flat Earth= CIA disinformation campaign

2017 (edited)

They're popping up in conspiracy/political forums, every 9/11 youtube comment section, and just about everything else that the government has a vested interest in marginalizing or discrediting.

They're Flat earthers, and they're spreading like the plague. Flat earth is like the 21 jump street of the conspiracy world.

Now, you're probably wondering where Flat Earth originated and why? Well, like all things dishonest and subversive it started with a Jew. His name is Cass Sunstein (shown at right).

"Conspiracy Theories" and government infiltration [edit]

Sunstein co-authored a 2008 paper with [Adrian Vermeule](#), titled "Conspiracy Theories," dealing with the risks and possible government responses to conspiracy theories resulting from "cascades" of faulty information within groups that may ultimately lead to violence. In this article they wrote, "The existence of both domestic and foreign conspiracy theories, we suggest, is no trivial matter, posing real risks to the government's antiterrorism policies, whatever the latter may be." They go on to propose that, "the best response consists in cognitive infiltration of extremist groups",^[35] where they suggest, among other tactics, "Government agents (and their allies) might enter chat rooms, online social networks, or even real-space groups and attempt to undermine percolating conspiracy theories by raising doubts about their factual premises, causal logic or implications for political action."^[35] They refer, several times, to groups that promote the view that the US Government was responsible or complicit in the September 11 attacks as "extremist groups."

Jews use cognitive infiltration

Flat earth sprang up artificially – it was deliberately seeded into the "truther community" or whatever gay name they use to describe people who question the mainstream media narrative. If it was real organic grassroots dissent, then it wouldn't have felt like a disinformation blitzkrieg targeting very niche conspiracy youtube videos – specifically: False flag terrorism, Holocaust revisionism, anti-zionist/"anti-semitic" videos and some basic "illuminati" videos about whatever.

They're channeling their efforts into attacking the most dangerous and subversive elements that threaten their power structure.

Things that they don't like us talking about:

-The truth -Traditional Christian morals -False flags/Hoaxes -Social engineering and the history of the Frankfurt School/Tavistock -Israel did 9/11 -Jews behind Bolshevism -Holodomor -ZOG -Vaccines/GMOs -Fractional Reserve lending and why we need to hang the bankers -Elite pedophile rings -Talmud -Zionist groups and other sinister NGOs promoting immigration of 3rd world sex criminals

To most people, who aren't mentally unhinged, it's easy to discern truth from fiction. You can tell the difference between UFO bull and dancing Israeli's. One of these things is absurdly crazy and doesn't deserve the time of day –the other is damning, and deserves further scrutiny. Some people get overwhelmed, and may even let their guard down the further they go down the rabbit hole. Here is an example of that, and if this woman isn't a lying shill then I do feel bad.

Flat earth pseudo science isn't easy to debunk. A flat earther vs. Normal person argument goes something like this:

Flat Earther: "Hey bro, it's cool that you're awake like me and know the truth about (insert random conspiracy theory) but do you know the full truth?"

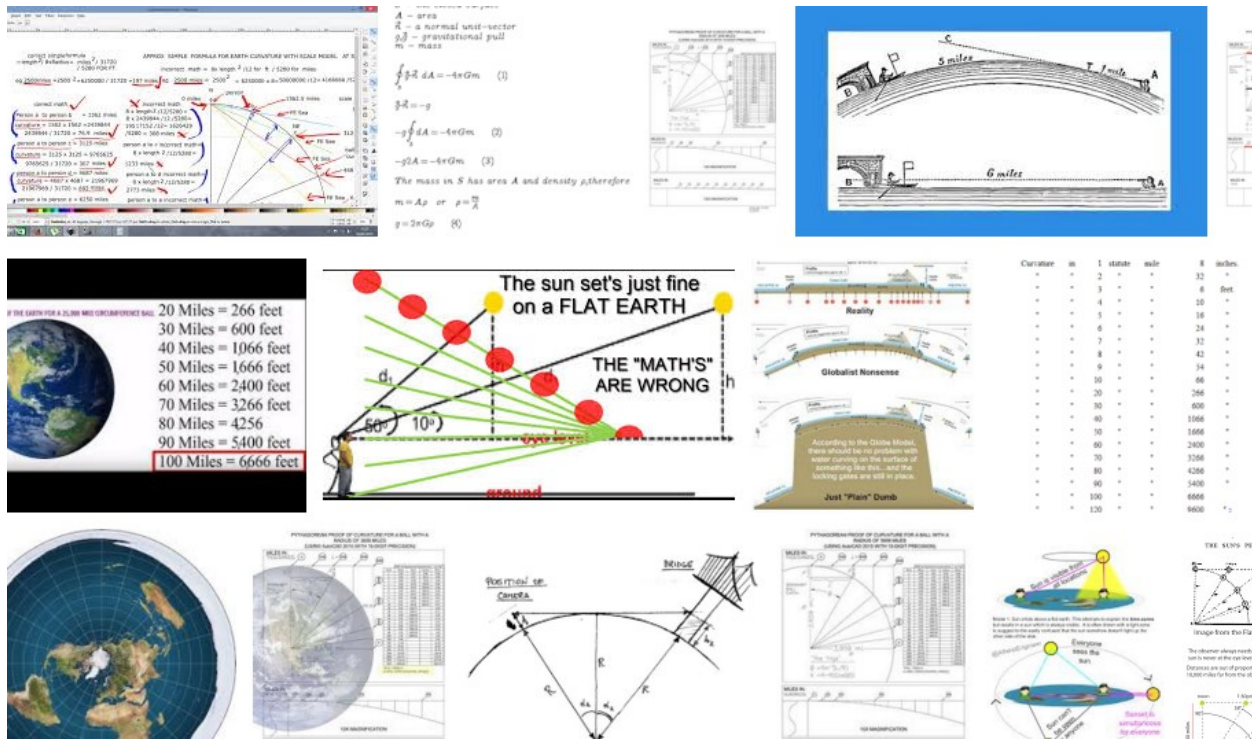

Normal guy: "Nah, whats that?"

Flat Earther: "the Earth is flat"

Normal guy: "b-but that's impossible"

Flat Earther: "check out <https://www.tfes.org/>

So then the normal guy goes to that Google site and sees this:

So now you literally have to do complex math problems and pull out a compass to debunk this nonsense! Wow, very convenient. I have to pick apart every single thing in their flat earth archives (which there is a lot of). With uneducated people they win by default, just because of the sheer amount of Hollywood special effects style mind fakery pseudo-science information they have fed their trolls and internet filter algorithms. After baffling you to death with fake science they often resort to saying "you didn't even refute the evidence".

Unfortunately, through many concentrated astro-turfing campaigns, MSM collusion and unlimited monopoly money, the CIA was able to successfully attach Flat-Earth to Antisemitism. This is no accident either.

Here are just a few examples of websights that are echoing these thoughts:

This is why disinformation is so dangerous. They have now created an entire subculture based around this. First it was those fools from the David Icke forums spamming nonsense about the Queen turning into a gecko. Years later it mutated into critical mass of shilling when they opened the gates of hell and relinquished the Flat Earth PSYOP on the internet. They can now inject their disinformation serum into anything they deem a threat. Anything mildly subversive that might gain traction online is now neutralized before it can ever grow into actual opposition.

Wanna discuss 9/11? Oh, let me throw a dash of flat earth into the discourse to cause infighting and derail the discussion

Wanna talk about how the government used crisis actors to stage a terror attack? Well f___ you, this discussion is going a little too well for my liking, I'm going to

accuse you of being a GLOBE EARTH SHILL! My buddies on CIA payroll will come back me up to astro-turf the ILLUSION of a flat earth consensus causing you COGNITIVE DISSONANCE.

It's the government playing wack-a-mole with you're brain, at the expense of you're mental health. It's poisoning the well of otherwise good information that actually holds merit, and corrupting it to the point where it can be discounted as fiction by the conditioned masses, because, well, the lügenpresse said so.

In conclusion, Flat Earth is a hoax. Eric Dubay, the purveyor of this trash, also believes that dinosaurs are fake.

These people are also attaching themselves to Nazism, they are doing this for a reason. Remember, these people are using the same blueprint that they used with David Icke. They are going to try and make antizionism/antisemitism synonymous with FLAT EARTH just like David Icke had been used to make elite pedophile conspiracy theories synonymous with REPTILIANS. The truth becomes null and void once they attach it to the "lunatic fringe".

Was David Icke right about the pedophile rings in Britain? Yes, absolutely! ...but did anything happen? No, because anyone who even entertained the idea got ridiculed because it was connected to the reptilian ludicracy.
